

STEAM FOOD LP 165

Low-pressure hose for steam and water, certified and approved for food contact. Designed for use in the food industry, it is resistant to UV radiation, ozone, and atmospheric conditions. The outer hose construction is micro-perforated to prevent the "popcorning" effect. This hose can also be used for transporting hot water up to +125°C and glycol. It is compatible with all water and steam coupling systems (do not crimp the steam hose hydraulically).

Always ensure the hose is thoroughly dried after use to prevent condensate buildup inside. Do not use the hose simultaneously for both water and steam.

Inner wall	EPDM – white
Outer wall	EPDM – blue
Reinforcement	strong textile reinforcement
Work pressure	7 bar
Burst pressure	70 bar
Temperature range	-40°C to +165°C (+125°C for water)
Norms	FDA, ISO 1307

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Coil (m)
80001323	13	23	61
80001626	16	26	40
80001931	19	31	61
80002537	25	37	61
80003245	32	45	40
80003852	38	52	40
80005167	51	67,5	40
80006381	63	81	40
