

CASTOR 20 OHM EPDM GREEN

Multi-purpose green rubber hose for hot water, cooling, and compressed air. Commonly used for various substances in plastic processing, industrial installations, and workshops.

The hose is torsion-resistant and maintains full flow even in narrow bends and short switches. It is highly drainable and durable, with an outer layer resistant to abrasion.

Suitable for transporting industrial water, water, glycol, light water-based chemicals, and compressed air.

The hose is conductive, with electrical resistance $R < 10^6 \Omega$ through the wall.

Inner wall	EPDM
Outer wall	EPDM
Reinforcement	Two textile reinforcements
Work pressure	20 BAR
Burst pressure	60 BAR
Temperature range	-40°C to +110°C
Norms	UNI EN ISO 1307/97

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Weight (g/m)	Coil (m)
