

AMERICA FLEX PVC

Freeze-resistant slurry tanker suction and discharge hose with a steel spiral.

A special PVC compound ensures the hose remains highly flexible even at very low external temperatures. It is suitable for use in municipal vehicles, tank trucks, and as a pipeline component.

The hose is designed for transferring fluids such as slurry, dirty water, light water-based chemicals, and fecal matter.

Inner Wall	PVC
Outer Wall	PVC
Reinforcement	Steel wire spiral
Temperature Range	-40°C do +45°C

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Work Pressure – BAR	Burst Pressure – BAR	Vacuum – BAR	Bending Radius (mm)	Coil (m)
