

GOLLUM FLEX ISO SD EPDM 120

Strong and flexible rubber suction/discharge (S/D) hose, reinforced with two textile plies and a double steel spiral.

Highly suitable for use as a slurry tanker hose (especially in large vehicles), as part of an elastic pipeline in demanding environments, or for conveying hot water and light chemicals.

Thanks to the SBR rubber construction, the outer layer of the hose is abrasion-resistant. The hose maintains excellent performance even at lower temperatures.

Inner wall	EPDM
Outer wall	Black corrugated SBR
Reinforcement	Two textile reinforcements, double steel spiral
Work pressure	10 bar
Vacuum	0,8 bar
Temperature range	-40°C to +120°C
Norm	ISO 1307

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Bending Radius (mm)	Weight (kg/m)	Coil (m)
1000754	63	79	250	2,31	40
1000753	127	146	550	5,36	40
