

MASTER-FORM ECO 100 EPDM

A versatile red or blue rubber hose for hot water, glycol, and air.

The ECO version is tailored for plastic processors where the coolant temperature typically does not exceed +90°C. At the same time, the hose maintains all quality parameters, including an outer wall resistant to abrasion, UV radiation, and ozone.

It is highly flexible and maintains full flow even in bends and curves. (For very tight and short connections on bridges, we recommend the MASTER-FORM.)

The hose is fully compatible with all popular quick coupling systems for injection molds.

Inner wall	EPDM
Outer wall	EPDM
Reinforcement	Strong textile reinforcement
Work pressure	10 BAR
Burst pressure	30 BAR
Temperature range	-20°C to +100°C

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Colour	Coil (m)
74000915	9,5	15,5	Red	40
74010915	9,5	15,5	Blue	40
74001218	12,5	18,5	Red	40
74011218	12,5	18,5	Blue	40
