

NITRO EPDM 20 AS

This universal pressure hose is suitable for various applications, including use as a nitrogen hose. Thanks to its high dimensional stability and low expansion under pressure, it is ideal for use on hose reels. It also performs well as a hot water hose, for example, in temperature control systems or for chemical pumping.

The hose's outer layer is resistant to harsh environmental conditions, including UV radiation and ozone. It is fully conductive, with electrical resistance $R < 10^6 \Omega$.

Inner wall	EPDM
Outer wall	EPDM
Reinforcement	Strong textile reinforcement
Work pressure	20 BAR
Burst pressure	60 BAR
Temperature range	-40°C to +110°C

Variant	Inner Diameter (mm)	Outer Diameter (mm)	Coil (m)
63001323	13	23	60
63001930	19	30	60
63002537	25	37	60
