

STABIL AIR TPE

Ultra-lightweight, high-capacity discharge hose combining two materials: thermoplastic polyurethane on the inside with a polyester coating, allowing for maximum performance while maintaining lightness and flexibility.

This hose is particularly recommended for use on reels, workshop compressors, and many other applications where ergonomics are important. It is suitable for conveying compressed air (including oil-laden air) and non-aggressive chemically active liquids.

The hose's outer layer is resistant to abrasion and harsh environmental conditions.

Inner wall	TPU - thermoplastic polyurethane
Outer wall	Polyester
Reinforcement	nylon
Temperature range	-30°C to +70°C

Variant	Inner Diameter (mm)	Work pressure – BAR	Burst pressure – BAR	Coil (m)
29000019	19	30	90	60
29000025	25	25	75	20
29000038	38	25	75	20
29005025	25	25	75	50
